A draw equal to a dozen of wins

If we judge by the score alone, which is now 4-3 in Analoly Karpov's favour, then we can say that nothing substantial has happened at the chess world little match these last few days. As the reader must have atropriy guessed the 7th game between the world champion and Garri Kasparov has ended in a draw and the one-point margin has been relained.

All that is as it may be, but it was precisely the drawn seventh game that made chess history. I, probably, will not be mistaken if I say that this game is bound to be included in voluminous monographs devoted to

the ancient game. In the game the challenger played White. The same as in the first game, in which Karpov suffered defeat, the players chose the Niemzowits defeace. But, of course, it was a new interpretation, offered by the champion already on the fourth move. Nevertholess, White managed to gain an advantage the

exchange and forced a draw with an endless check! dozen wins!

modification notwithstanding and Black's King was jeopardized. In this situation Karpov resorted to a calculated risk. He scemed to be "leading with his chin" making his King's situation even more precarious. This confessed Kasparov who started choosing far from the best moves to make. And as time passed it was already Black who had the advantage. Now Karpov already could win. However, another "but" developed. The champion (who was in a very had lime trouble by the end of the game) also started making for from the best moves in the intricate game. And then came the excellent outcome. Kasparov, realizing that Black still could be a milsance to White, lost the

POLITBUREAU WEEKLY MEETING

The Polithureau of the CPSU Central Committee has discussed the Party's new draft Programme worked out on the basis of a docision taken by its 26th Con-gress. The meeting noted that the draft, presented to the Politbureau, reflects the main trends in the country's domestic development and in the international situation; that it takes into account the experience accomulated by the Party since the adoption of the present Programme, it was stated that the draft is based on the sets of goals put forward at the April 1985 Plenary Meeting of the CPSU Central Committee and at a conference on the acceleration of progress in science and technology. This makes it possible to determine, more precisely and specifically, the prospects for the development of Soviet sociely and ways and means for the achievement of our supreme goal — Communism. In this respect underscored is the primary

'IOWA' VIOLATES SWEDISH WATERS

public of Sweden regards as a crude political provocation the crossing of the Oresund Strait and Swedish territorial waters by the American cruiser "lowa".

This sort of demonstration of militarism is nothing but a premeditated act of provocation non-participation in military alliances and blocs. It defles the craving of the peoples in the Nordic countries to declare the North of Europe a nuclear-free

WILL U.S. CONDEMN FRENCH TESTS?

Canberra. Australia and other countries in South Pacific will be disappointed if the United States does not condemn French nuclear tests in the region, Australian Prime Minister, Robert Hawke, recently told journalists in Warwick (the state of

The head of the New Zcaland Government, David Lange, has also said that the entire world condemned the French nuclear tests and that it is now up to the United States to clear its position on the matter.

So far, however, the Reagan bornly mute over the tests. The United States is quite happy with the demonstration of the French nuclear muscle in South Pacific. France's action distracts some of the indignation felt by the people in the region while the United States is continuing its nuclear build-ups in our part of the planet, said the leader of the Australian Democrats Party. Donald Chipp.

VIEWPOINT

"Afghan borders will be open

to friends but closed to ene-mies". This is what the Afghan

leader, Babrak Karmal, said to

sum up the recent Supreme Jirgah (Council) meeting be-tween border tribes held recent-

ly in Kabul. The Jirgah delibe-rated on the need for a more

active participation of the bor-

der population in the struggle

gangs.
"To Protect the Revolution!"

is a slogen which is still topical

in Alghanisian. Alghan reactionaries who have fied abroad and

are on Washington's pay soil have not laid down their arms.

Pakisian is being increasingly

drawn into the undeclared was

against the country. Whereas in the past the conversion of Pak-Islam into a springboard for US

aggression against Alghanistan was characterized in Islamabad

as extension of "islamic solidar-

ity", loday Zia ul-Haq openly declares that the war being lought by the American counter-

revolutionary hirolings is also a "Pakisteni war".

Those are not mere words. Standing behind them ere spe-

zone and to take specific steps to relax international tensions, notes the newspaper "Norrskens

. In the late 70s, Sweden ban ned the entry into its territorial waters of warships with nuclear weapons on board. Besides, any foreign ship which intends cross its territorial waters should seek permission from the competent Swedish authorities. A spokesman for the Swedish For eign Ministry said that in each such case, the request should mention not only the time and the place where the ship intends to enter the country's territorial waters, but also its main charncteristics, such as onboard weapons and their types. However, no request came from the "lowa". At the very last moment the Americans attempted to obtain permission to call at the port of Stockholm, but were re-fused.

The "Iowa" is now bound for

Lasting peace is peace for all

(Continued from page 1)

The truth of this conclusion is particularly obvious in the present era of nuclear space developments, he said. Strict compliance by states with the under taking, embodied in the UN Charter, to live in peace with each other as good neighbours, which to us is the essence of peaceful coexistence, is the only realistic alternative to nuclear

OF THE BLUE BLOOD

The blue blood flows not only in the veins of fairy kings and princesses. It also exists in nature, but only in the lower forms of life — spiders, scorpitus for a long time it. ons, crabs. For a long time it was not clear why the nature replaced haemoglobin, the basis of which is Iron, with hemoclanin — a substance on the basis of copper. Recent investiga-tions of scientists from Munich zoological institute showed that without hemoclanin spiders would not survive. They have no veins and arterles, and how to supply without vessels the whole organism with oxygen? This function is fulfilled by hemodanin owing to its compli-cated structure. As a supersenaccurately necessary portions oxygen. At the same lime, it levels out body temperature in keeping with external conditions.

KILLER PLANT

Egyptian agriculture loses up to a quarter of its harvest because of rais and other rodeds because of rais and other roderits immune to ordinary posticides. But recently in the province of Sharkis peasants have discovered a litherto unimove plant, which attracts rais and them, destroys them. A special commission has been set up to excipre sits characteristics. The fital experiments show that the rais, having tested the plant dis within a couple of days. According to the researchers, the prapilical application of the plant, would save a cultural produce worth saverage millions of Egopian pounds.

FROM the SOVIET PRESS

EUROPEAN CHANNEL

The IZVESTIA political analysi A. Bovin exposes bourgeois propaganda speculations about the alleged Soviet desire to embroil West Europe and the USA in a quartel.

I will not reveal any secrets by saying that the Soviet Union in its policies does take the divergence in views between Western Europe and the US into account, notes the author. Our intent here is not to squeeze the US out of Europe in what some shrewd Western political analysts claim to be a desperate bid for political control over the continent. Our objective is by lar less ambitious. We would like to avail ourselves of the possibilities Europe offers as a trans-Atlantic channel to bridge the obvious gup in the present US administ-

The "strategic delense initialive" is the latest instance of this, the author points out. One is under the impression that Europe is more aware of the dangers the "star wars" programme could trigger off, than the USA is. The Soviet Union considers it useful il European preoccupations in this conneclion could be taken heed of across the ocean. In the long run it would benefit not only the Soviet Union, but also Western Europe and even the USA unless today's White House imperial ambilions instead of US long-term political interesis are

ADVENTURIST HOPES FOR SURVIVAL

Now that the South African Republic to in a most acute crisis in the wake of the actions by its oppressed black majorily uprecedented both in scope and scale, Pretoria's growing extremism is not accidental, analyst Tarulin writes in PRAV-DA in connection with the South Africa's aggression in An-

The government has practically lost all control over the situation in the country as the camp of apartheid proponents has been greatly divided. In this context its rulers oppose to

be staking high on military ventures for their power build-up, the author noics. The apartheid regime has again recoursed to armed strikes following the new economic "sanctions" the USA and other West European countries recently introduced. The sanctions have turned out to be sheer bluit. Pretoria was relieved to see its Western patrons continue to aid and abot it while con-

demning it in words only.
Incidentally, the US is the only country to have abstained in a most conspicuous way from voting for a resolution condemning the aggressor at the UN Security Council meeting,

which was convened at Angela's request.

The recent actions by Washington and some of its NATO allies, who try to cover up the racists, lead them to becoming more and more aggressive, the author points out.

ATTEMPTS TO REVIVE THE HACKNEYED

In the year of the 40th anniversary of the Victory over German lascism and Japanese militarism altempts by Western reactionary circles to faisily the history of the Second World War have become increasingly active, Corresponding Member of the USSR Academy of Sciences P. Zhilin writes in the KRASNAYA ZVEZDA newspapet. The campaign of slander and disinformation they launched, is continuing. Now it has been timed for the 40th anniversary of the Nuremberg Trial of the main German was criminals, that began on November 20, 1945 and ended on October 1, 1946. Bourgeois mass media, par-ticularly in the FRG and other NATO countries, are trying to whilewash German militarism and lascism, to blot out the crimes perpetraied against mankind from the peoples' memory, to denigrate the Soviet Union's steps aimed at strengthoning world peace and security, the author points out. The hackneyed myth about the "preventive" character of fascist Germany's war against the USSR has begun to be widely aired

again as part of Imperialist ideological weaponry. Struggle for peace and friendship among peoples, for disarmament, against war is the USSR's principled and permanent policy which arises from the nature of socialism, the author emphasizes. There are no such social forces, no classes that have vested interests economically and politically in war and war preparations in the Soviet Union, in other countries of the socialist community:

ACCORDING TO NAZI SCRIPT

Verdicts of not guilty for war criminals appear to resemble more and more a "well-rehearsed saript" in the FRG, A. Parkhitko writes in SOVIETSKAYA ROSSIYA. This is precisely what Adalbert Rückerl, director of the West German Centre of Justice, had in mind as he told an AP reporter that "According to our data, there are irom 70 to 100 thousand maxi criminals on the territory of the FRG today. It is impossible, however, to bring most of them to trial".

Such activities points out the author, encourage neonaxis.

Such activities, points out the author, encourage neonaxis and ferrorists, whose number is growing in the PRG, to make more and more brazen and active attacks.

OF INTEREST

A travelling cow

A larmet in the American state of Florida has decided to sell his cow called Jultana. The buyer took Jultana in a forty to a place 50 kilometres away. The formor maker was greatly surprised when the caw, rejurned the tost day. In just twenty house, the animal had grossed several molorways and rivers. It weakened and grew thin As a reward for this loyalty, the larmest fetuthed the maney and sold that he would nevel part with Jultana again.

of lobsters

Swimming championship among. lobslers was held in a small Canadian town. More than 100 of the drustaceous species, judged by the strict jury, crawled on the bollom of a huge aquarium to the "linish". The lirst was a lobster called "King", which justified its name with honoty.

As an gward "King" was gianted its life. Other compe-lifors which had no laurels were eaten by the jury membors and lans, True, the price was considerably higher, Aller all, they were celebrities s

Long-term cooperation programme

A, long-term Soviel-Polish programme of scientific-technical cooperation has been signed in Warsaw. This document, outlining the strategic aims of co-operation between the USSR and Poland, is a basis for the elaboration of common policies for both countries in science and technology. The aim of the programme is all-round acceleration of scientific and technological progress, its close interaction with specialization and cooperation of production for 1986-1990 and subsequent years.

The programme provides for joint work in seven priority directions. It outlines concrete problems to be fully solved from Joint research and scienti-fic-technical developments to production and mutual delive-ries of goods. It has been plan-ned that between 1985 and 1990 a number of new types of machines and equipment, as well as central and measuring equipment will be worked out

UN-sponsored international seminar of geriatrists in Kiev

A UN international seminar on the problem of ageing has ended in Kiev. It was held at the Kiev Institute of Gerontology, Europe's largest research centre for studying and spreading the experience of work to ensure active longerity, which coordinates the activities of all similar institutions in the Soviet Union and European socialist countries. It is a lease of the World Health Organization and has often hosted international forums.

During the ten-day seminar representatives of 27 developing countries were familiarized with the achievements of socialist countries in organizing, ensuring and encouraging labour activities of senior citizens. Prominent Soviet scientists shared with the participants the experience accumulated in their studies and briefed them on the work of clinics, laboratories and a number of specialized in-

The participants in the seminar also discussed the problems
of social policy concerning the
family and the state's role in
prolonging the labour activities
of the elderly. They also heard
a number of lectures by UN scientific consultants.

Aid from outer space

Irina GRISHINA. representative of the foreign relations board, USSR Ministry of Merchant Marine

VIEWPOINT

"Search and Rescue at Sea" is the motto of the 1995 World Day of the Sea to be marked by all countries at the end of September. This tradi-tion is rooted in the decision of the 10th session of the Interna Lional Marilime Organization (IMO), which includes 127

The molto of the Day of the Sea was not adopted by mere chance: the 1979 international convention on search and res cue at sca - SAR-79 - worked out with the active particl pation of Soviet experts, came into force in June 1985. The alm of the convention is to set up a worldwide system of search and rescue at the seas and oceans for people in dist-ress as a result of shipwrock and air crashes, trespective of their nationalities.

A maritime rescue service was set up in the USSR long before the convention was adopted and effected more than 60 years ago. At present Soviet merchant marine ships and fishing frawlers work practically in all parts of the World Ocean. At SOS signal they change course at any given time and, braving bad weather assist the needy.

Prompt notification about di saster is highly important under present-day conditions. There-fore, in 1077 the USSR, the USA, France and Canada began joint work on the development of a system to save sinking ships and crashing planes by means of satellites. It is called COSPAS-SARSAT and Incorporates the following aspects: emergency radio-buoys moun led on ships and planes and meant for transmitting information about disaster; artificial Earth salellites which receive SOS signals and transmit information to the ground stations for subsequent processing; in formation receiving points which geographically determine the scene of disaster and sys tem control centres.

Practically the COSPAS SARSAT system began operat ing in 1982, when on September 10 signals about the air crash of the streraft CESSNA-172 were received from a Soviet ar ifficial Earth satellile and the information receiving centre of Canada in the mountains of Brilish Columbia. The pilot and the two passengers were saved. Apart from the four coun-

tries which designed the sys-tem, Bulgaria, Britain, Nor-way, Finland and Sweden parti-cipated in lesting it. The checking was done in various parts of the world from the Arctic to the Antercife and in different climatic and natural conditions — in forests, mountains, deserts, on ice and on water. The tests confirmed the global character of the zone of action of COSPAS-SARSAT and the high accuracy of the automatic de-termination of disaster, coordinates. The system was ba internalional Civil Aviation Organization), which recomm ded its use by ships and all craft in distress.

craft in distress.
Though COSPAS SARSAT is
yet at the stage of experiment yet at the stage of experimentof exploitation, during its existence more than 160 feacus
'operations have been conducted, which prevented the death
of over 500 people. This shows
again that, with the goodwill of
states with different socio-political systems, there are many
possibilities of pooling efforts
for the joint work exploration of outer space for peacoful

DIFFICULT ROAD TO YAKUTIA'S WEALTH

A decision has been taken to build a new rallway line to connect the Baikai-Amur Mainline (BAM) with Yakuisk, capital of the Yakui Autonomous Republic, PRAVDA reports.
Yakulia is located in the eastern part of the USSR

Extreme North. The proposed fallway line will open up the approaches to mineral deposits of the ragion. It will cross almost the whole of Yakutla and two districts of the Magarian Region in the Soviet Far East. The total surface of the area adjacent to the proposed railway ine is more than 3,000,000 square kilometres. Gold, illamonds, polymetallic ores, coal, and mica are being extructed there. Geologists believe that major deposits of gas and oil are concentrated in Yakutla's subsoils. Timber resources in the area amount to 15 per cent of the country's total.

The jewel-of South Yakutla are coking coals, the newspaper notes. Coul seams up to 80 moties thick are lying close to the very surface of the earth. Several coal mines, with a total output of 0,300,000 tonnes, are expected to be put into operation there. The conf extraction will reach there 25-30 million tounes annually by the end of the current century.

In close proximity to the coul basin rich from ore denosits have been discovered.

To build a 830-kilometro railway line-Amur-Yakulsk -about 100 million cubic metres of carth will have to be moved, including took and permatrosi. The length of embankment will be 704 kilometres, of cultings 126 kijomotros. More than 700 artilicial crossings, including about 200 bridges, will have to be built. Among them will be several major ones deross the Aldan. Āmga and Ļena rivois.

The construction and maintenance of the railroad will be carried out in extremely severe climatic conditions, with frosts reaching 63°C. This is an area of blan-ket permatrost and congented ice which adds to the dif-

CRITICISM-MEDICINE OF ART

crature or writer.

The magazine JOURNAUST organized a discussion in which playwrights, artists and critics reflected on theatrical criticism. Lyudmila Chursina; a well-known drama actor, expressed her views on this issue,

As an actress, writes Chursina, I value criticism first of all, for sincerity and benevolence. I, think that criticism must contain a moment of some collaboration with those you are writing about. The initial striving is to help and not catch out, to go into the matter and substantiate why this or that the not come out properly. 'A critic must strive not for self-expression but for

pen. Perhaps, the more a critic departs from his own self for the sake of what he is writing about - helps give life to something or corrects some inaccurate vision —the more he deserves respect. The main thing lot a journalist is to be sensitive and capable for co-en-durance. In fact, there are no synonymous phenomena. And the task of a critic is to understand the complexity of situations in life, to find in himself a sense of objectivity and justice. There is such a notion as "medically in the protection" in the protection of the content of the content in the protection. cine" in the projection of the human organism, the body and the spirit. So, criticism must be the medicine

The newspaper SOVIETSKAYA ROSSIYA wilks about dermaloglyphics, a science studying skin patterns of paims and feet.

The peoples of ancient Orient were the lira to draw the peoples of ancient Orient were the lirst to grew attention to palm signs. Fingerprints used in place of signatures have come down to us. But skin patients can tell much more. The designs of palms and tell found tell much more, The designs of palms and tell found tell much more, The designs of palms and tell found tell much more, the designs of palms the suppose who live in Burope, North Por instance, among those who live in Burope, North Africa and Americans of European origin loops in palms turn up more often than ringlets. By linger palterns one can tell even the sex of a nerson. terns one can tell even the sex of a person.

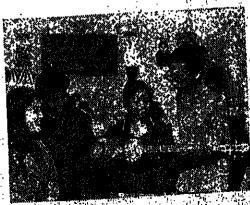

Dermatoglyphics as a science is comparatively young. However, there is no doubt that its methods will some be used more widely in medicine as well. By the peet-liarities of akin relief of paims and feet, it is already invisible to possible to know about some hereditary diseases and correspondingly, about the health of future children of a young married couple. In some obsidite clinics and medico-genetic advice bureaus the imprints of skin paking a couple are used as a couple. lerns are used as an auxillary means, during medic check-ups, concludes the newspapers.

BAISA STRUCHKOVA

She was a ballering at the Rolshot before she rollred from the stage, having ended her dancing carrier. Today she is the editor-in-chief of the new magazine "Soviet Ballet", founded in 1980. She clanced on the famous Bolshof stage for three decodes, creating a whole gallery of characters, always full of inspiration, both in classic and modern ballets: "Swan Lake", "The Siceplag Beauty", "The Fountain of Bakhchisaral", "Don Quixote", "Giselle", "Romeo and Juliel", "Lalla and Majnun"... She felt at home both as a comedian, in warmbearted lyrical roles and in lolly tragedy. She was loyal to the linest traditions of Russian ballet, and combined polished

When asked how she feels in her new capacity of a Journalist, she said:

Undoubtedly, at the beginning the melamorphosis that had taken place to my life was up something that was totally unknown and unfamiliar. It is one thing to watch a ballel, to

leagues. It is different to be in charge of a periodical which priotic critical estiand speaks of currents imider way to ballet as such, appraising and analysing new productions, the work of dancers and cho-reographers... And yet, this is also ballet and has siways been part of my life. I agreed.

Our magazine is scientific and theoretical, critical and publicistic. This determines its contents and face. We publish theoretical articles and views of ballel critics who have accumulated a lot of interesting observations and ideas. They write about dance styles and how to deal with classic heritage. They speak about modern choreography and its paths. We write about out-standing dancers and those who are just budding up. We print comments on ballets in the ropertip. We print comments on ballots in the roper-loire of Soviet companies and the best ones denced abroad. We publish articles on the his-tory of Russian, Soviet and foreign ballot, bib-liographic notes, and information on new publi-cations. On our readers' requests we have started explaining special ballet terms. We publish arlicles on designers, musicians, and composers who have played this or that outstanding role in the history of ballet, both Russian and foreign.

Our magazine is bimonthly. At the beginning It had a circulation of 30,000. Now it is 43,000 copies, it has aroused increasing interest in readers abroad and they subscribe to it through

V/O Mezhdunarodnaya Kniga.

Have you left the Bolshol for the post of edi-

No. I continue working there but it is my pupils who are dencing on its stage. It is a very responsible job to be a coach. Sometimes I feel more nervous when my pupils dance than when I was dancing myse!!. Besides, I teach at choreography department of the State Lunacharsky Institute of Dramatic Art.

Duties as editor have helped me develop a new approach to ballet as an art. I have learnt to analyse it, to view it from a broader plane, comething like an outlook. This helps me, in turn, work with the young.

I should like to hope that my personal experience on theatro stage and as a teacher is not altogether use ess for the magazine. Passing my knowledge to the young I keep learning from them. And I bring all this "luggage" to the ofphosis that had taken place in my life was fice. More important, I continue regarding mysolf strange and new. I did not agree at once to take as part and parcel of belief. This is a continue-

office in your country.

We speak different languages. but we have a common one the language of international trade, said Horst Schmid, Minisler of International Trade in the Government of Alberta, He was addressing Altatech 85, the first independent exhibition mounted by Alberta, a main oilrefining province in Canada. Earlier, Canada's equipment and technology for oil and gas industry have been presented at the Neftegaz-83 in Baku and Neftegaz-84 exhibitions in Moscow.

The exhibits, presented by more than thirty firms for the exhibition at Krasnaya Presnya. include various vehicles and items related to financing, transportation of gas, lechnology portation of gas, technology to gas purification, manufacture of equipment, hydraulic devices, control systems, Arctic installations, geological developments, corrosion control equipment, packaging of sulphur, and drit-

ling technology. To us, Altatech-85 is an historic occasion, as it marks a giant stride in the economic co-operation between Alberta and operation between Alberta and the Soviet Union, said Horst Schmid. Alberta is the only place in the world where gas is extracted from oil-bearing sands.

Cruises along great Russian rivers

FACTS and EVENTS

Exhibitions, Tomsk residents now have the opportunity to see the works of the great Flemish painter Peter Paul Rubens at an exhibition opened at the regional art museum, it features 70 colour photo-facsimile reproductions of his paintings made by the Relation flow Acts Garage by the Belgian firm Agfa-Ge-vari. The originals are stored at he museums and calhedrals of Antwerp, where the master worked for many years.

Cinema. A feature film, "Singing Russia", Is being shot in the Voronezh Region. The part of the indefetigable and telen-ted collector of Russian songs, Mikhali Pyainlisky, is played by Yuri Solomin, an actor with the Maly Theatre company.

Tours. The Academic Sym phony Orchestra allached to the Moscow Philhermonic Society and directed by Dmilry Kilayen ke has set out on a four of European countries. The orchestra is to perform in Czechoslova-kla, Austria, FRG, Italy and Liechtanstein. The programme includes Russian and loraign classics, as wall as works by:

modern composers. Festivals. Days of Soviet liferature and the arts are going on in the Afghanistan capital, Kabut. A representative delegation of the USSR Union of Writers, including lamous prote-writers, poets and literary critics, have rrived in the city to perjicipate In It. The programme of the Days incorporates meetings with the Soviet man of latters and their Alghan colleagues, as well as liferary recitals and discussions with young toaders.

Art exhibitions

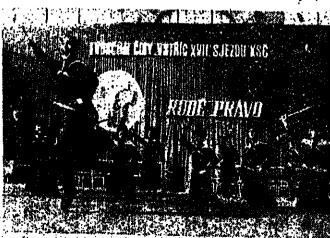

The inhabitants of Paris will see the works of Moscow applied artists soon to be dis-

played in France.
'This exhibition continues (amiliarizing foreign visitors with the creative works of Soviet fine arts," says O. Butkevich, Secretary of the Board of the USSR Artists' Union. Another oxhibition from Soviet museum collections — "Tradition and Search" — was displayed in Paris not long ago. The paint-ings of artists Boris Ugarov and Alexander Shmarinov have been shown in the cities of Austria and the FRG.

In another development, the artists of Bulgaria, the GDR, Po'and, Czechoslovakia, the FRG, Spain and dozens of other

creative contacts with foreign colleagues a place of prominence is devoted to mutual exchanges with creative groups. The Intercosmos group operates fruitfully, it embraces artists in the socialist countries whose works deal with outer space, Creative contacts are being expanded between Muscovites and art workers of Dulsburg and Düsseldorf (FRG). The USSR Arlists Union is the initiator of major international exhibitions, among them "Satire in the Struggle for Peace" and exhibitions organized under the motto "For Peace, Humanism, Against

a Nuclear War".
